(Confidential.) Oct. 8/81. Prof. Asa Gray, LL.D., *President of Harvard Univ.*
 My dear sir. I need not tell you that we have passed through since 1873 a terrible crisis and a terrible fight, and that Johnson's Cyclopædia has stood the racket and come out victorious. Now, just when we (publishers and editors) are ready to reap some pecuniary benefit for our labor—the key having quite paid for itself—we are beset by a number of Cheap-John Cyclopædias. In order to reach a class not able to immediately purchase our present key, and as a stepping stone to customers for the larger work, and to hold our canvassers, we are forced into getting up a 1 Vol. key, to contain not over 1500 pages with the same type and in the same style and making it cover the general ground of our present 4 vols—by cutting down articles and eliminating others, putting in some new ones, etc., etc. Now, I do not feel that it would be quite right to get out this work, and not give you the opportunity of remodeling, etc. your own articles, and if you choose those in your line, thereby entitling you to the credit of your own articles and also the pro rata royalty till 1890 when another revision would have to be made on account of the 1890 census. Of course a set of proofs would be sent you from time to time for as much or little cont.

cism (outside of your own work) as you might feel disposed to give for the good of the whole work. I need not add that you are decidedly my first choice. You know that I proposed continuing the royalty upon the present key. and as the 1 Vol. key will greatly aid the sale of the larger work, we shall all be mutually benefitted. The Atlas part will be from new copper plates, and the whole will be a table or hand book of a superior order. The most careful calculating has been done so that I know what we can do, provided every man keeps within the space allotted for his articles, which he must do. The maps are being engraved - much of the drudgery is well in hand. The scientific name of an article (if it has one and is the heading) must be popularized, e. g., a turkey must be called a turkey and not Meleagrididae. It will have an immense sale because it will be a valuable, taking work, and there is nothing like it, and will reach those unable to purchase the large work, being built upon the merits + will be sold upon the reputation of the 4 Vol. key. All to whom I have brought the subject approve and will take hold. It will not require much of your valuable time as cutting down will be the principal work, and not searching for material, as before, to make the original article, and there will be a year to do it in, and we can have the work in market in 12 months and samples in Courvasser's hands by Christmas next. The royalty to begin with its sale - if you write upon new subjects you will be paid \$10. a page as formerly - for cutting down articles \$5. a page of the 1 Vol. - the amount advanced for cutting down only to be deducted from the royalty. More when I hear from you. Please reply soon. As ever sincerely yours. A. J. Johnson. (Dict.)

P.S. Drs. Barnard, Drisler, Chandler, Dwight, Hitchcock,
Schaff, Woolsey, Genl Barnard, Brackett, Prof. Petersen —
in fact every one of the original staff heard from have
approved and accepted, and I mean to have the same
staff of Editors as upon the 4 Vols. Please reply soon
and I hope favorably. Find enclosed envelope for
